February Forecast
In November, the budget forecast showed a $1.332 billion surplus in Minnesota for fiscal years 2020-21. The February forecast now shows an increase in surplus of $181 million, for a total surplus of $1.513 billion. Now that the February forecast has been released, we can expect more chips to fall into place around the Legislature. The Governor will release his supplemental budget proposal next, and House and Senate committees will be given an idea of how much money they may have to work with (if at all). The odd numbered years of the biennium are when the state budget is set, so constitutionally, no additional funding needs to happen this year.
